

A BRIEF INTRODUCTION TO STORER CALCULUS

Notation	Interpretation
$\underline{Q}.X$	Opening X . $\underline{Q}.1$ is “hang the loop on your thumbs and pinkies”.
\overrightarrow{F}	The finger F passes away and over the strings.
$\overrightarrow{F}(\underline{s})\#$	The finger F passes over the strings picks up s on its back and returns.
\underline{F}	The finger F passes towards the body and under the strings.
$\overrightarrow{\overrightarrow{F}}$	Pass the finger F to the right.
$\overleftarrow{\overleftarrow{F}}$	Pass the finger F to the left.
$F\infty$	The loop of string surrounding the finger F .
$> F\infty$	Rotate the F loop half a turn away from.
$< F\infty$	Rotate the F loop half a turn towards you.
NF	Lift the $\ell F\infty$ over the $uF\infty$ and off the finger F .
$\square F$	Release the loop on the finger F .
$F\infty \rightarrow G$	Place the F loop on the G finger.
$\underline{Q}.A$	$\underline{Q}.1 : \overleftarrow{\overleftarrow{R2}}(\underline{Lp})\# : \overrightarrow{\overrightarrow{L2}} \downarrow (R2\infty) : \overrightarrow{\overrightarrow{L2}}(\underline{Rp})\#.$
